Subject: RE: Revised Bids for Waste Disposal

Mickey:

I have a couple of questions:

"This proposal does not include cleaning of vacuum boxes or of frac tanks left on site."

Question:

- 1. Are they going to clean out and triple rinse all tanks, vacuum boxes, and frac tanks, and other containers so you can recycle, sale, or otherwise dispose?**
- 2. What are they going to do with the materials that have been spilled to the concrete in and outside the buildings? (ie. pressure wash, collect, and dispose or other similar activity)**

Thanks

Subject: Revised Bids for Waste Disposal

David,

Here are revised bids based on the assumption that the waste in roll off box 601 is non hazardous plant trash waste. Visual observations of the waste in the box indicates that the waste is likely mostly plant trash with oil in the box. We are assuming, since we cant sample it, that it is nonhazardous.

The bid for the remainder of the waste does not include the two roll offs that we will be disposing of in the near future.

Please call me if you have any questions.

Thank you,

Greg Blomquist
